Announcement Asian Dengue Course 2010

Faculty of Tropical Medicine, Mahidol University
16-21 August 2010

Rationale:

Dengue is the most important mosquito borne viral disease that burdens tropical regions around the world. A recent estimate of 36 million cases of dengue fever occur annually, resulting in 2.1 million severe dengue cases with 21,000 deaths each year. Thailand has been a dengue endemic area since the 1950s. Knowledge and experience on dengue viral infection has been accumulated and applied for effective management and control of dengue infection. Through this particular training course, participants will gain knowledge and experience from real situation in this highly endemic area. Proper management of dengue viral infection requires an update comprehensive knowledge in all relevant aspects.

Objective:

To provide, review and update basic and most relevant advanced knowledge and experience with dengue disease, regarding its epidemiology, clinical management, integrated vector management and disease control.

Course venue:

The course will be held during 16-21 August 2010, at the Faculty of Tropical Medicine, Mahidol University, 420/6 Ratchawithi Road, Bangkok, 10400, Thailand

Participant:

Medical Doctors or Health Officers

Course Registration Fee:

- 6 days whole course: 1,200 USD
- 4 days theoretical aspects: 750 USD
- 2 days workshop (select only one workshop): 550 USD

The course registration fee includes lunches, welcome and farewell dinners, coffee breaks, field site traveling and accommodation during field visit. The fee should be paid in advance directly to the Faculty of Tropical Medicine, Mahidol University, Bangkok, Thailand. This course requires a minimum of participants at least 5 persons, and maximum is 20 persons for each workshop.

Course content:

4-Day Lecture

1. Dengue epidemiology current situation
2. Dengue virology
3. Pathogenesis & Pathophysiology of dengue infection
4. Potential antiviral drugs
5. Clinical characteristics of dengue
6. Clinical approach to suspected dengue infection
7. Dengue infection in adolescent and adult
8. Dengue in special circumstances
9. Unusual manifestations in dengue infection
10. Management of dengue fever / dengue hemorrhagic fever
11. Laboratory dengue diagnosis
12. Future directions in dengue diagnosis/ management
13. Current topics in vector biology
14. Integrated vector management
15. Dengue vaccines currently in the pipeline

2-Day Workshop

1. Practice in dengue laboratory diagnosis
2. Clinical diagnosis & management
3. Vector control & community participation

Learning experience:

This course consists of lectures, case demonstrations and discussion at the Faculty of Tropical Medicine, Bangkok as well as case studies, ward rounds, laboratory practices in a hospital and visiting vector control unit in a dengue endemic area during workshop's field visit. The course will be conducted entirely in English.

Facilitators:

Experts in various fields of dengue viral infection

Registration & Certificate:

Participants can register for the whole course or select only theoretical course or one workshop. A Certificate of Completion will be awarded to successful participants achieving the registered course accordingly.

Accommodation:

TROPED International House: single occupancy air- conditioned deluxe class (900 Baht/room/day); does not include meals.

List of Speakers:

Dr. Scott B Halstead
Clin. Prof. Suchitra Nimmanitaya
Khunying Ananda Nisalak
Prof. Arunee Sabchareon
Prof. Usa Thisyakorn
Prof. Krisana Pengsaa
Clin. Prof. Siripen Kalayanarooj
Prof. Terapong Tantawichien
Prof. Prayong Vachvanichsanong
Assoc. Prof. Wijitr Fungladda
Assoc. Prof. Pratap Singhasivanon
Assoc. Prof. Nopporn Sittisombut
Assoc. Prof. Chamnarn Apiwathnasom
Assoc. Prof. Sukathida Ubol
Assoc. Prof. Apichai Kongphatthanayothin
Asst. Prof. Darintr Sosothikul
Asst. Prof. Suvit Bunyavejchevin
Asst. Prof. Watcharapong Piyaphanee
Dr. Wichi Satimai
Dr. Apiwat Tawatsin
